Dear Cattlemen and Women,

First of all, we would like to welcome you to our Annual Bull Sale, and thank you for your continued support and interest in our program. As a seedstock producer we consider it a privilege to provide genetics to the cow-calf producers of this industry. In addition, we consider it our responsibility to provide a breeding animal that is free of defects, disease, or any other problem that can occur. With the emergence of genetic defects affecting some lines of Angus cattle it is prudent to select cattle that are either free of the defects by pedigree or have been tested free. Our cattle do not have any of the known carriers or suspect lines for these defects in their pedigree.

This year's offering is a product of 46 continuous years of breeding Angus cattle for the commercial cattlemen and women of this country. The bulls are the most uniform, heaviest muscled, deepest bodied set of bulls we have ever offered for sale. They have been developed in a manner that will ensure their soundness and longevity. The bulls reached only a 44 mega cal ration, which included sorghum silage, alfalfa hay, earlage, and only 3 lbs. of DDG.

The bulls in this year's offering are a result of a program that has had the same focus from the start. We have a planned approach to breeding cattle with a balance of traits, and focus on females that are problem free, fertile, easy fleshing, have superior udder quality, and are sound on their feet and legs. It is important to profitability that they calve early every year, raise a good, healthy calf, and maintain themselves on forage without supplementation. In addition to being the thickest, deepest set of bulls raised here, there is a large selection of calving ease bulls that performed across the board.

Once again the sale will be broadcast on RFD-TV by Superior Productions. There is a video preview of the bulls available on the Superior web site, or we would be glad to mail you a DVD on request. If you are interested in participating through Superior it is important to register ahead of time.

We have included all the performance and ultrasound data in the catalog. The bulls will be semen tested by sale day and actual scrotal measurements will be available anytime prior to the sale. The bulls are fully guaranteed and we stand behind them 100%. If you have any questions or problems with the bulls we want to know.

If we can be of any assistance, please contact us at your convenience.

- Matt and Chuck Tastad

Sale Terms & Conditions

All cattle sell under the standard terms and conditions of the American Angus Association. Terms of the sale are cash.

Volume Discounts:

We will discount your purchase price 3% on 3 head purchased by one buyer and up to 10% on 10 head purchased by one buyer.

Delivery:

We offer free delivery in North Dakota and adjoining states on all bulls and free delivery up to 1,000 miles on purchases totalling \$2,500. Beyond 1,000 miles delivery will be billed at cost.

Sight Unseen Purchase Program:

If you cannot attend the sale and would like to purchase bulls, please give us a call and we'll be glad to help you with your order. Describe the type of bull, minimum and maximum parameters and price range. We want to assure you that your bid will be handled with the utmost professionalism and your money handled like it is our own. We guarantee 100% satisfaction on all orders. If you get the bull and don't like him, we will take him back.

Herd Health & Nutrition

Herd Health:

The McCumber herd is in excellent health, and all cattle sell with interstate health papers. Bulls have been vaccinated with Pyramid 5 + Presponse, 7-way, Dectomax and have had a complete fertility test

Nutrition:

The bulls were fed a high roughage ration. The ration was balanced to ensure the bull's soundness and longevity. We reached a maximum of 44 Mega Cal, and the protein level was 13.8 percent. The bulls are hard, sound footed, and have not been pushed at all. The ration consisted of Alfalfa-Grass hay, Pea Silage, Sorghum Silage, and Whole shell corn. In December the corn was completely replaced with earlage as the only grain source. For those that do not know what earlage is, it consists of the grain, cob, and husk, thus adding additional fiber to the ration. Considering the winter, and low mega-cals we were very pleased with how the bulls performed. In the past we have fed a medicated creep before going to pasture, however this past spring the calves received no supplemental feed at home in the lot, or on pasture.

Marketing

If you have calves sired by our bulls, or females bred to our bulls, we would like to help you market them. We, along with the Spickler Ranch, sponsored the 4th Annual Angus Partners commercial female sale in Mandan. The consignors realized a considerable premium over the current market for their McCumber and Spickler sired replacement open and bred females. We are planning to continue with this sale and would be happy to accept your consignment at any time. I would also suggest checking out the Angus Source program. This is a very effective way to set apart your Angus sired feeder cattle, and replacement females.

Semen Interest

You will notice that we are retaining an interest in quite a few of the bulls. These are bulls we may want to collect semen from in the future for use within our herd. If we are able to sell semen from your bull, we would share with you any revenue generated from the sale of semen. The bulls would be collected when it was convenient for you. The buyer has full possession and salvage value of the bull. Many of these bulls will undoubtedly sell in the price range of the commercial man.

The cowherd known for Outstanding Maternal Traits.

- One of the all-time best sires used here.
- A consistent sire of light birth, calving ease progeny that have outstanding newborn calf vigor.

Sinclair Extra 4X13

- He sires moderate framed cattle with performance, thickness, and length
- His daughters are some of the best young cows on the Ranch, with neat tidy udders, mothering ability, easy dispositions, fertility, and productivity.
- His first daughters in production have a combined weaning ratio of 102, and here at Mc Cumber they are 104 on their calves for weaning.
- He consistently adds IMF to his progeny
- Semen quality on his sons have been excellent
- He is a popular sire with commercial cattlemen around the country, and has been used in some of the very top herds
- Owned with Sinclair Cattle Co., N-Bar Land and Cattle, Lewis Hagen, and Genex Cooperative Inc.
- Semen available through Genex.

- 536P was our choice through the 2006 Sitz Spring Sale
- He is a consistent sire of moderate, deep bodied, naturally thick cattle.
- His daughters are very impressive with an abundance of rib, thickness, and superior udder quality.
- His first daughters in production have a combined WWR of 102, and bred back well after raising their first calves
- He is a brother to Sinclair Excellency 5X25, Sinclair Rito Legacy 3R9, and Sinclair Net Present Value, all leased to major AI studs.
- He will continue to play a role in our program and is appreciated for his ability to sire forage efficient, easy fleshing, super uddered females.
- Owned with Sitz Angus Ranch
- Semen available from Mc Cumber

Selling ½ interest and full possession- Recommended for use on heifers- We have started the last two sales with 4x13 sons and this year he has done it again. 975 is the type of bull to build a cowherd around, not only is he backed by an outstanding dam but he has been a standout since birth. 975 has a classy, masculine beef bull look. He is extremely long bodied with abundant depth, and width of body. He puts a foot down in all four corners and has a long, smooth wide tracking stride as he moves around the pen. Along with this he has a wide deep quarter, and excellent scrotal development.

His dam B Pride 463 of Mc Cumber is a no miss female who possesses the top weaning ratios of any cow on the Ranch. B Pride 463 is a powerful female with an abundance of volume, natural width, and a near perfect udder with small well placed teats and snug, well suspended attachment. She is extremely fertile, settling first service AI every year, and consistently brings in a good one. Her dam has settled first service AI 6 of 7 years and has been a good solid producer as well with a BWR 6/100, WWR 6/103, YWR 6/101, IMF 6/110, and REA 6/99. Her grand dam sold

Dam of Lot 1, B Pride 463 of Mc Cumber.

Maternal brother to Lot 1, 8144.

Maternal brother to Lot 1, 7137

through our 2000 female sale to Sterling Land and Cattle in TX and was still in production last year at the age of 17. 463 maintained her pathfinder status with a calving interval of 4/366, BWR 4/101, WWR 4/116, and YWR 4/111. She has produced two sons that have sold through the last two bull sales for an average of \$7750 to Joe Bohl in ND, and her only daughter in production is an outstanding female by Boyd New Day with a BWR 1/95, WWR 1/109, YWR 1/107 and is currently nursing an outstanding son of 4X13.

975 has the performance, phenotype, and pedigree to be a herd building sire with a balance of traits. He is not an "outlier" in any trait but solid in many. We would expect him to breed true to his type. He is one of the best 4X13 sons we have bred, backed by one of the top cows ever on the Ranch.

Selling ½ interest and full possession – This herd bull prospect has a pedigree loaded with breed greats, performance at the top of his contemporary group, and a classic Angus look. 9112 weaned off his outstanding young dam with a 205 day weight of 773 lbs. to ratio 115 without creep, had an ADG of 3.7 to ratio 114 and a 365 day weight of 1365 lbs. to ratio 115. Along with this, his visual muscle expression is confirmed by the fact that he had a REA of 14.9 to ratio 115. 9112 is a moderate framed, heavy muscled, deep bodied beef bull with that small classic Angus head. He has a huge expressive top line that leads to a big thick rear quarter. He is good scrotaled and travels nicely as he moves around the pen.

His dam is an outstanding daughter of Sitz JLS Emulation EXT 536P, and is a member of the same cow family that produced the Lot 1 bull in this sale. His young dam

B Pride 7171 of Mc Cumber, dam of Lot 2

OCC Missing Link 830M

is a well made, easy fleshing female with an outstanding udder and sound feet and legs. After weaning this big bull calf, she bred back early and actually calved earlier this spring and is nursing an outstanding heifer calf by OCC Tremendous 619T. His dam is off to a good start and his grand dam is a good producer with a WWR 6/104, YWR 4/101, IMF 4/115, and REA 4/104.

His impeccable pedigree, explosive performance, and outstanding type make 9112 one of the most unique herd bull prospects to sell this year. We plan to use him in our program.

Selling 2/3 interest and full possession- 959 is one of the most powerful sons of 4X13 that we have ever bred. He is stout made, deep bodied, and thick from front to rear. This 814 lb. weaning weight bull has excelled at all measures, earning a 205 day weight of 735 lbs. to ratio 109, gaining nearly 3.80 lbs/day to ratio 116 and recording the heaviest actual yearling weight of the group at 1326 lbs. to earn a 365 day weight of 1340 lbs. to ratio 112. His dam is a powerfully built, deep bodied, moderate framed, easy fleshing female that has been an excellent producer and is a daughter of one of the greatest Right Time daughters we have ever owned. The entire cow family from which she descends all have been top producers.

His dam is a maternal sister to one of the top sellers from the 2008 bull sale Mc Cumber Hard Drive who sold to Ryg Angus in MT for \$9500 and is the sire of several of the bulls selling through this sale. Lassie 443 has two daughters retained here at Mc Cumber with the first ratioing 110 on her first calf, and

Lassie 206 of Mc Cumber
is the grand dam of Lot 3.

Sinclair Extra 4X13
is the sire of Lot 3.

the other, just a first calf heifer nursing a nice heifer calf by Mc Cumber 4X13 Extra 751.

A stout beef bull with herd bull credentials and a maternal heritage second to none. If you need a cow bull to add fleshing ease, thickness, capacity, and the ability to thrive in any environment put 959 on your list.

upper percentiles of the Angus breed for that trait.

His dam is without question the top daughter of

Maternal brother, 8103, of Lot 4

Maternal sister, B Pride 613, of Lot 4

004 on the Ranch. She is tremendously deep bodied, thick made, moderate framed and near perfect uddered. B Pride 404 has not only been extremely productive, but also breeds back quickly, and maintains her condition as well as any female on the Ranch. She descends from a line of cows that has been outstanding for fertility, production, and soundness.

The progeny of B Pride 404 have not only performed well but have been in demand with one daughter and 2 sons selling for an average of \$6250 through past Mc Cumber sales. Her first daughter sold to Gary Liebrand through our 2006 female sale and her first son sold to Rustin Smith in NV and he reports that the bull is handling the desert conditions he runs in very well. Her son from last year sold to NLC Simmentals in SD as the fourth high selling bull for \$8000.

9180 has jumped through every hoop and is backed by a cow family that has been excellent not only for the measurable, but also for disposition, fertility, fleshing ease, calving ease, and soundness. Not only should 9180 sire females that will work in any environment, but the male counterparts will be marketable in either a registered or commercial cattlemans program.

Selling ½ interest and full possession- Recommended for use on heifers- 911 is a real chunk sired by Missing Link. He is a high capacity, wide based, thick made bull that is easy fleshing, big scrotated and good on his feet and legs. He started with a modest BW of 79 lbs. and went on to wean off his dam at 735 lbs. He did extremely well on feed with an ADG of 3.89 lbs/day to ratio 120 as one of the top gaining bulls in the pen. He recorded a 365 day weight of 1313 lbs. to ratio 110 and scanned a REA of 14.2 to ratio 109. 911 is packing a lot of pounds on a moderate frame and defies the light birth = low performance genetic antagonisms. His dam is a moderate framed, good uddered daughter of N Bar Primetime D806. She has been extremely fertile settling AI 3 out of 3 times and is doing a good job while being a light BW type of cow. Her dam is the outstanding donor for us and Oak Hill Angus in VA, Miss Wix

Right: Grand dam of Lot 5,
Oak Hill Miss Wix 9402

Below, left: Maternal brother
to Dam of Lot 5, 8134

Below, right: Maternal sister
to Dam of

9402. 9402 has done an excellent job here with a WWR 5/108, and YWR 4/104. Along with this, she produced last year's high selling bull to C.S. Fitzgerald in VA for \$10,000. She also produced another son that sold to Thompson's Royale Manor Angus in Indiana and produced the 2nd high selling heifer calf in our 2006 female sale to Bohi in KS for \$7000, who later went on to produce a \$4750 heifer pregnancy in the Foundation Female sale, and sale topping bred heifer for Buford Ranches in OK. 9402 is an easy fleshing, super uddered daughter of EXT and her only other daughter in production here has a WWR 2/103.

This neat pedigreed son of Missing Link puts a lot of things together in a powerful, pleasing package. He did well in many areas and would be an outcross pedigree to many of our customers. Calving ease, thickness, fleshing ease, and environmental adaptability are bred into this good bull.

Selling ½ interest and full possession- Recommended for use on heifers- A definite herd bull candidate by 4X13 out of a herd bull producing dam. 964 is a maternal brother to a past sale topper Mc Cumber 004 Traveler 513 who sold to Larry Wunderlich in TX for \$12,000 and was used back in our program. 964 is a long bodied, heavy muscled, deep ribbed, sound footed calving ease herd bull prospect. He pushed the scale down at weaning to 795 lbs. without creep, gained above average on test and earned a 365 day weight of 1245 lbs. to ratio 104. His expressive top is confirmed with one of the largest REA measurements of the group at 15.1 to ratio 116.

His outstanding Right Time dam has been a top producer, extremely fertile, super uddered, and very easy fleshing. Her only other son Mc Cumber 004 Traveler 513 is siring outstanding females as well with one daughter the dam of the herd bull prospect selling as lot 10 in this sale. Miss Wix 301 has been very productive with a BWR 5/97, WWR 5/102, YWR 5/102, REA 5/107. The cows behind 301 have been outstanding as well with a string of 5 consecutive pathfinders included in this line of cows. Miss Wix 301 has 3 daughters in production here at Mc Cumber and all three are off to a good start. Miss Wix 301 has never missed settling AI staying with the tradition of the Miss Wix cow family which is known for their outstanding fertility.

964 has the genetic heritage to produce perfect uddered, moderate framed, easy fleshing, highly fertile females, and males with muscle, length, and performance. Don't miss him.

Selling 2/3 interest and full possession- Sure to be a favorite sale day. This first son of Sitz Rainmaker 6536 is a stout, heavy muscled, big hipped, thick rumped beef bull. His BW EPD of +1.8 would indicate calving ease potential, but probably should be used on the cows first. 9117 weaned off his superb dam at 814 lbs. to earn a 205 day weight of 751 lbs. to ratio 111 and scanned a REA of 14.2 to ratio 109.

His pathfinder dam is a moderate framed, perfect uddered, good footed daughter of Mc Cumber 6122 Equator 8113. Her production has been excellent with a WWR 5/108, YWR 5/106, and REA 5/109. The cows lined up behind her include multiple generations of pathfinders that have stood the test of time. Two sons that sold through previous bull sales have sold for an average of \$4200 to Rick Mc Conville in NE, and Jim Bowers in ND.

9117 has a pedigree stacked with great maternal sires such as Rito 054, Shoshone Viking, Traveler 124, Rainmaker, Alliance, Rito 953, Traveler 1148, 9929, 155. Some don't care about the pedigree, but we believe it is a picture to the type of females the bull will sire. There is no doubt 9117 will sire top females.

Selling 2/3 interest and full possession- Recommended for use on heifers- 9005 has really impressed me this winter and is a near replica of his sire. This thick made, wide based, heavy muscled son of 4X13 is large scrotaled and has a quiet disposition. He is moderate framed, and excelled for ultrasound with an IMF of 4.08 to ratio 123, and a REA of 13.8 to ratio 112 in the ET contemporary group. 9005 is a maternal brother to the \$14,500 sale topper Mc Cumber 004 Traveler 6120 who sold to Kemnitz Angus through the 2007 sale. We just calved the first daughters of 6120 and really like them, they are moderate, easy fleshing, quiet dispositioned, and good uddered. We plan to use him heavily this spring.

His dam, Erianna 2206 of Mc Cumber, is an outstanding pathfinder donor cow that sold to Matthew Volkmar of Kemnitz Angus in SD for \$6000 through the 2009 female sale. His full sister sold to Best Angus in ND, and another maternal brother sold for \$6250 to Red Rock Ranch in SD through the 2005 bull sale. 2206 is a no miss female that is extremely fertile, sound footed, good uddered, and easy fleshing. She has been an excellent producer with a WWR 5/109, YWR 5/110, IMF 15/104, and REA 15/103. She has two daughters in production with a combined WWR of 5/106,

and her 24J daughter has produced two sons that have sold for an average of \$5850 to Brad Gilbertson and Daniel Lakefield in ND.

9005 has legitimate herd bull potential. This good looking, sound structured, heavy muscled bull can excel at many things that add to your bottomline.

Maternal brother of Lot 8.

Selling 2/3 interest and full possession-Recommended for use on heifers- 9144 is the top performer of the calf crop, and combines performance, uniqueness, and maternal heritage to be a potential sale topper. He was the top weaning calf with a 205 day weight of 830 lbs. to ratio 123 as his dam's first calf. He continued to perform and gained 3.70 lbs/day to ratio 114. He is the top yearling weight bull as well with a 365 day weight of 1422 lbs. to ratio 119. 9144 is long bodied, thick made, square hipped, and free moving. His dam is a Timberwolf daughter out of Miss Wix 2022 of Mc Cumber who topped the 2009 female sale at \$26,000 to Sinclair Cattle Co. She has been outstanding with her daughters producing the #1, and #3 weaning weight bulls of the calf crop, and another daughter by 004 produced the top selling bull of the 2008 bull sale to Currant Creek Angus, Lance Johnston, and Russell Becker in MT. Full brothers to Miss Wix 7173 sold for an average of \$5500 through the 2009 bull sale to Lookout Stock Farm in SK Canada, and Bill Striefel of Oberon. 9144 descends from many generations of top producers, and pathfinders.

9144 is a larger framed, high performing son of Missing Link that has been on top of the calf crop for performance from the start. Along with this he is backed by an outstanding cow family that has been getting the job done for many generations.

Selling 2/3 interest and full possession- Recommended for use on heifers- 993 combines sure shot calving ease and outstanding carcass ultrasound, which resulted in some of the best stats across the board of any bull in the sale. 993 is long, smooth, and structurally sound. He moves with ease as he travels and his big top is confirmed by an excellent REA of 14.1 to ratio 108, and scanned an IMF score of 5.30 to ratio 148 and earned the #2 IMF score of the group. He started at only 73 lbs. but went on to wean off his dam with a 205 day weight of 770 lbs. to ratio 114 as his dam's first calf.

His dam is a moderate framed, good uddered daughter of Mc Cumber 004 Traveler 513. She is a member of the Rosetta cow family and traces to the dam of Mc Cumber 6122 Equator 8113. She calved early this year and is currently nursing a super full sister to 993.

The cows behind 993 have excelled for production, calving ease, and carcass ultrasound. His combination of calving ease, early growth,

and carcass backed by a cow family that reinforces those traits make 993 a predictable source for siring cattle that possess these genetics which directly affect profit.

Selling 2/3 interest and full possession- Recommended for use on heifers- 9150 has been a favorite of mine since birth. His combination of meat, muscle, soundness and fleshing ease will make him go to the top of many lists. He is wide based, big scrotaled, square hipped, and good footed. He did well across the board with ratios for weaning, yearling, ADG, IMF, and REA all well above average. Along with this he descends from an excellent cow family, and his grand dam is a full sister to Mc Cumber 6122 Equator 8113. His dam is a moderate framed, easy fleshing, good uddered daughter of 004 and is currently nursing an outstanding full sister to 9150.

This balanced trait son of 4X13 is one of the best in the sale. His type and performance would lead me to believe he would work in any environment.

Maternal brother to Lot 11.

Rosetta 421 is the great grand dam of Lot 11.

Selling 2/3 interest and full possession- Recommended for use on heifers- This moderate framed, thick made, son of Sitz Rainmaker 6536 should be a sure thing on heifers. He started at only 72 lbs. at birth and sports a -1.0 BW EPD. 922 is free moving, deep bodied, and expressive in his rear quarter. His dam is a moderate framed, easy fleshing, good uddered daughter of 4X13 and had another light birth calf with a BW of only 64 lbs. out of Mc Cumber Hard Drive. His dam is the type of female that would thrive in the harshest of environments. We are really looking forward to getting the 6536 daughters into production as they have that broody beef cow look. I would expect 922 to be able to sire the same type.

9155 will top the list of many if they are looking for pounds, performance, and power. 9155 is a stout made, deep bodied, naturally thick son of Mc Cumber 004 Traveler 6120. He earned a 205 day weight of 727 lbs. to ratio 108, gained above the average and recorded a 365 day weight of 1271 lbs. to ratio 107. Along with this he scanned a REA of 14.0 to ratio 108. His dam is a moderate framed, perfect uddered daughter of BT New Trend 172K and sold to Bill Streifel in the 2009 female sale. She has produced two daughters that sold to Circle V Angus Ranch in ND, and JSK Angus in NY. Her only other son sold to Mark Smith in ND.

9155 is a super structured, big scrotaled, gentle bull that will add pounds, power and performance to a calf crop.

Selling 2/3 interest and full possession- This big, stout, powerful son of 4x13 has jumped through all the hoops. He had an actual ww of 805 lbs. to earn a 205 day weight of 734 to ratio 109. He gained above the average at 3.41 lbs/day, and recorded a 365 day weight of 1280 lbs. to ratio 107. He did well on the ultrasound as well with an IMF of 3.8 to ratio 106 and a REA of 14.9 to ratio 115.

His dam has been outstanding from the start. Her first calf was one of the top selling bulls of the 2007 bull sale to Currant Creek in MT for \$9000, and her second calf sold to Blake and Silas Chapman of Chapman Cattle Co in Alberta Canada for \$5000. She has been a top producer with a WWR 4/109, YWR 4/106, IMF 4/114, and REA 4/111. She is currently nursing another outstanding bull calf by OCC Tremendous 619T. Lassie 434 is a perfect uddered, sound footed daughter of Pine Creek Right Time. She is easy fleshing, thick made, and one of the top producing cows on the Ranch.

Although not a calving ease son of 4X13, 990 is a bigger framed bull that should add pounds and performance to a calf crop.

This Rainmaker son is definitely worth your attention. 9107 is a masculine, big topped, smooth shouldered eye catcher. He is big scrotaled, good headed, and extremely sound on his feet and legs. He performed near the top of the group with an ADG of 3.7, and earned a 365 day weight of 1287 lbs. to ratio 108. His REA of 14.2 for a ratio of 109 backs up the visual muscle expression he displays.

His dam is a perfect uddered daughter of BT New Trend 172K, and sold to Rick and Leann Slaubaugh through the 2009 fall female sale. Lassie 2140 is very docile, and is the dam of Lassie 434 who has done such an outstanding job for us. Along with 434 she has 2 more daughters retained here at Mc Cumber and they possess the same flawless udder that 2140 displays. Her other mature daughter is the dam to the tank selling as lot 51 through this sale. Lassie 2140 has never missed to the first service AI and has a WWR 6/102, and YWR 6/103.

9107 is one of the top Rainmaker sons in this sale. He should not only sire pounds, muscle, and sound structured cattle, but also females that will be neat uddered, fertile, and productive.

The first son to sell by the 2008 sale topper, Mc Cumber 4X13 Extra 718 and what a complete bull he is. 9142 is long bodied, smooth fronted, and extremely correct from every angle. He is square hipped, big scrotaled, and moves with ease as he travels.

His dam is a solid producer and is out of one of our best Mc Cumber 054 Rito 326 daughters. She is off to an excellent start with a WWR 2/107, YWR 2/103, and IMF 2/106. Her only daughter sold to JSK Angus in NY through our 2009 female sale.

9142 is sure to catch you eye. He is complete and should sire problem free, high performing cattle.

Great grand dam of Lot 17.

Maternal grand
dam of Lot 17.

EPDs										Dam's Prod.		
BW	WW	YW	Milk	SC	IMF	REA	Fat	\$W	\$B	BW	WW	YW
0	40	1+69	20		0.17	0.18	0.011	29.15	28.4	2/91	2/98	2/100

Selling ½ interest and full possession- Recommended for use on heifers- If you like them moderate framed, full of meat, super sound and backed by one of the top cow families in the breed, 9104 might be for you. Since the day I pushed him in the barn as a newborn so he wouldn't freeze his ears I thought 9104 had herd bull potential. 9104 is big topped and carries that muscle out in to a square, powerful hip and rump. He puts a foot down in all four corners and tracks wide and free as he travels. He has the classic small Angus head, and is well developed in the scrotal department. With a scan weight of 1125 lbs. he recorded a REA of 14.6 to ratio 112, and has a REA/CWT of nearly 1.30.

One of the best parts about him is his beautiful dam. Miss Wix 6145 is a moderate framed, easy fleshing, sound structured daughter of 4X13. She has a flawless udder with small well placed teats. It is level from front to rear, and attaches up high and tight from behind. It is free of excess hair and looks like the kind that will last forever. She is very fertile, settling first service AI every year, and is currently nursing an outstanding heifer calf by Sitz Rainmaker 6536. I would call her very efficient, problem free, and the kind I would like a whole herd of. Not only is her phenotype

very appealing but she descends from some of the top cows ever on this Ranch. Her dam is Miss Wix 7111 of Mc Cumber who became the replacement to Miss Wix 365. She is a maternal sister to the last three top selling females in our fall female sale. Miss Wix 2021 of Mc Cumber who sold to Fortune's Rafter U Cross Ranch in the fall of 2003 for \$15,000 was the first. In 2006 Terry Little in MO bid \$12,500 to purchase Miss Wix 6151 of Mc Cumber to make her the top selling lot in that sale as just a weaned heifer calf, and last fall Miss Wix 2022 generated a lot of interest and sold to Sinclair Cattle Co. for \$26,000. The Miss Wix cows not only generate a lot of interest when sold, but they have consistently been some of the top cows on this Ranch, not just for production, but fertility, longevity, udder quality, and soundness. Miss Wix 6145 of Mc Cumber, although young, is well on her way to following in the footsteps of the cows from which she descends.

Sure 9104 is just average across the board on his performance, but in actuality the best cow makers, most maternal bulls, are not the highest performing, extreme outliers. 9104 is a unique combination of the Ohlde's Dixie Erica cow family, the Lady Ida's from the N Bar, and the Miss Wix cow family from here at Mc Cumber. I am confident that 9104 will not only sire the type of forage efficient, fertile, problem free females that add to profitability, but the male counterparts will be thick, heavy muscled progeny that will be marketable in any number of ways.

0.3	39	1+75	30		0.41	-0.08	0.042	27.63	36.25	1/97	1/109	1/116

Selling 2/3 interest and full possession- Recommended for use on heifers- More meat, muscle, power and stoutness than you would expect from a calving ease bull. 9137 is a well made, big scrotaled, deep bodied beef bull. He has been exceptional at every measure with a 205 day weight of 737 lbs. to ratio 109 as his dam's first calf. 9137 is the #1 ADG bull of the group with an ADG of 4.07 lbs/day to ratio 125, and earned a 365 day weight of 1388 lbs. to ratio 116 and win the #2 spot in that category. His ultrasound was exceptional as well with an IMF of 3.98 to ratio 111, and a REA of 13.6 to ratio 105.

His dam is a moderate framed, sound structured daughter of Mc Cumber Total Value 449 who topped the 2005 bull sale to Larry Wunderlich in TX. She descends from the powerful full sister to Mc Cumber Foundation 701, and is nursing another outstanding bull calf by the Circle V, Coleman herd sire Coleman Emblazon 780. She has settled first service AI her first two times out, and is off to an excellent start.

9137 could very well have been moved up in the sale order because of his outstanding performance and excellent type and kind.

9145 is the first son of Mc Cumber Hard Drive 7150 to sell. 7150 is the outstanding 004 son of Lassie 206 who sold to Ryg Angus through our 2008 bull sale for \$9500. I think you will appreciate this sire group for their stoutness, muscle, depth of body, and sound structure. 9145 is a near replica of his sire. He is thick, wide based, deep bodied, and excellent on his feet and legs. He gained 3.7 lbs/day and earned a 365 day weight of 1269 lbs. to ratio 106.

His dam is a neat uddered female with small well placed teats and excellent fore and rear udder attachment. She is a member of the Lassie cow family and is a 3rd consecutive generation pathfinder. She sold this fall to Kemnitz Angus Ranch in SD.

Multiple generations of pathfinders and outstanding cows both top and bottom make 9145 a predictable sire of both top-notch females, and males with early growth, and performance.

Selling 2/3 interest and full possession- Recommended for use on heifers- Stylish, sound, heavy muscled, and high performing are terms used to best describe this real complete son of 4X13. 952 has been a standout since birth. He started with only an 82 lb. BW, but earned a 205 day weight of 753 lbs. to ratio 112 as his dam's first calf. Along with outstanding early growth he continued to perform and gain 3.44 lbs/day to ratio 106 and recorded a 365 day weight of 1303 lbs. to ratio 109. 952 is level and square out through his hip and has a very desirable hind leg set. In addition to his excellent performance he scanned extremely well for REA with a 14.5 to ratio 112, and earned one of the higher REA EPDs for a 4X13 son.

His dam is a real tank. She is moderate framed, big bodied, and naturally thick. She is good uddered and comes from a cow family with a history of producing large REA. 4 generations of females tracing back to the first cow with ultrasound data have an average REA ratio of over 108. A maternal brother to B Pride 787 sold last year to Bill Striefel for \$5250.

952 has the bred in ability to add REA, thickness, performance, and sire females that will be fertile, moderate, and easy fleshing.

Sinclair Extra 4X13 is the sire of Lot 20.

953 is a masculine beef bull with tremendous muscle expression throughout. Along with this he is long bodied, big ribbed, and sound. He performed well across the board with an ADG of 3.74 lbs/day and a REA of 15.1 to ratio 116. His REA would rank him towards the top of the contemporary for that trait.

His powerful dam is a high volume, easy fleshing, good uddered member of the Miss Wix cow family. She has earned a WWR 2/105, and YWR 2/108. Her only other son sold to Mitch Johnson in IA for \$4000.

Want to add pounds, performance, and muscle? Make sure you check out this good bull.

Selling ½ interest and full possession- Recommended for use on heifers- 9006 is a genetic gem with the style, structure, and maternal heritage to move a cow herd to a whole new level of excellence. He is level hipped, wide pinned, and has an ideal hind leg design. He stands down on a well shaped hoof with plenty of heel. He tracks wide and true, and is a herd bull prospect that can add a lot of positives to any herd.

His donor dam is one of the top Miss Wix females to ever reside on this Ranch. Miss Wix 2027 of Mc Cumber is a 6th consecutive generation pathfinder, and one of the soundest, most fertile females we have ever had. She is moderate framed, easy fleshing, excellent footed, and very productive. She never missed AI even when being flushed, and maintains her flesh well even while bringing in one of the heaviest WW calves every year. She has produced two sons that have sold through previous bull sales for an average of \$8000 to Brad Gilbertson in 2005 and to North Star Angus Ranch in our 2008 bull sale. One of her young daughters produced the 2nd high selling bull in last year's sale for \$9000 and he has sired an outstanding set of calves

Miss Wix 352 of Mc Cumber

Grand dam of Lot 22.

The bulls shown here are maternal brothers to Lot 22.

for us this spring. Miss Wix 2027 sold through our 2009 cow sale for \$10,000 to Oxbow Ranch in MT, and they also selected a full sister to 9006 through that sale as well. Another full sister that is retained here at Mc Cumber is a phenomenal female with worlds of potential in the replacement pen. Her production has been excellent, and so has the outstanding females from which she descends.

This calving ease, cow making herd bull prospect has the genetic propensity to sire the type of females that will work in any environment. He is backed by generations of top females that have been productive, fertile, long lived, and valued for the contributions that they have made in not only our herd, but the herds in which their progeny have gone on to work. He will be used back in our herd not only because of the individual that he is but also as a way to bring his outstanding dam back into our program.

Selling 2/3 interest and full possession- Recommended for use on heifers- 973 was the #1 actual WW bull of the calf crop. After starting at only 78 lbs. he went on to wean off his dam at 822 lbs. and earned a 365 day weight of 821 lbs. to ratio 122 as his dam's first calf. This big scrotaled, wide made, tank is loaded with meat. He has an abundance of rib, and stands down wide on his feet and legs. His early explosive growth and performance, and light birth weight make him a unique herd sire prospect.

His dam is a moderate framed, easy fleshing, docile daughter of 4X13 that has an excellent udder with small well placed teats, and super attachment. She settled first service AI after raising this big bull calf and is nursing a heifer calf by OCC Tremendous. His great grand dam is one of my favorite Foundation daughters and sold to Buford Ranches in OK through this past fall's female sale.

Great grand dam of lot 23.

This moderate framed, masculine, muscular beef bull is bred to thrive in the harshest environments. We really like the combination of Missing Link X 4X13 for siring cattle that are moderate framed, but still have the ability to grow early and possess the muscle and capacity to work under a forage environment.

Selling 2/3 interest and full possession- Recommended for use on heifers- 982 is another one of my favorites. He is extremely masculine through his head and neck, and possesses the muscularity throughout that we look for in bulls. He is another one of those bulls that was average on performance but still weaned off his dam with an actual WW of 725 lbs. and recorded a 365 day weight of nearly 1200 lbs. In addition to this he scanned very well with an IMF of 4.57 to ratio 128, and a REA of 13.2 to ratio 102. 982 is moderate framed, wide based, deep bodied, heavy muscled, and is a result of mating 4X13 to one of the top Right Time daughters on the Ranch. His dam is an outstanding daughter of Right Time that epitomizes a profitable beef cow. She is extremely fertile, easy fleshing, good uddered, and has excellent feet. She is a problem free, low maintenance female that gets the job done year in and year out. Lassie 521 has never missed settling by first service AI and maintains her condition well. Her dam, Lassie 974 was the top selling cow in our 2006 cow sale and produced a herd bull for us that was retained and used here at Mc Cumber. Lassie 521 has produced two sons that have sold through previous bull sales to Gary Ledoux, and Rick and Leann Slaubaugh for an average of \$3500. We consider Lassie 521 one of the top cows on the Ranch, and will be flushing her shortly. 982 is a perfect representation of our program with the maternal side of the pedigree representing the progression of sires of 376, Viking, New Trend, Mc Cumber 124 Traveler 212, Mc Cumber Foundation 701, Right Time, and 4x13. 982 is truly the kind that will consistently sire the type of cattle that will work in any environment.

Selling 2/3 interest and full possession- The first of two flush brothers by Right Time and the only two Right Times in the sale. 9020 is a stout, heavy muscled, deep bodied bull with excellent performance across the board. He earned a 205 day weight of 720 lbs. and had a 365 day weight of 1259 lbs. He scanned a 13.7 REA to ratio 111.

His dam is a beautiful donor dam by Mc Cumber 6122 Equator 8113. She is neat uddered, easy fleshing, and sound on her feet and legs. She sold this past fall to Best Angus and will enter their embryo program this spring. Two full sisters to 9020 have calved this spring and have near perfect udders, and are super first time mothers.

9020 represents one of the last opportunities to purchase a Right Time bull here at Mc Cumber. Not only is he a complete bull, but is out of a wonderful cow.

3.3	43	I+67	24	I+31	0.28	0.03	0.017	26.91	30.67	5/97	5/96	5/92

This masculine, stout made beef bull is heavy muscled, wide based, and long bodied. He weaned off his dam at 800 lbs. without creep and earned a 205 day weight of 769 lbs. to ratio 113. 9174 reminds me a lot of 536P and he is one of the most impressive mature bulls you will see.

His dam is a moderate framed, easy fleshing daughter of BT New Trend 172K. She is a member of the Miss Wix cow family and sold to Ervin Helmuth this past fall through our female sale.

His sire is doing an outstanding job at consistently producing females that have near perfect udders, are deep bodied, naturally thick, and easy fleshing. They ratioed 102 at weaning with their first calves and breed back quickly and probably are even doing a better job with their second calf.

I think this sire group often gets overlooked because most of them are the younger end of the bulls, but 536P is a consistent sire of muscle, fleshing ease, and excellent females.

You will notice that 902 was born in December. His sire was getting out that spring and actually sired 3 calves. 902 is a ruggedly built, big scrotaled, masculine beef bull that should be able to handle a few more cows than the average yearling. His sire is a maternal brother to the Lot 4 bull in this sale, and was sold to Rustin Smith in NV where he is running under desert conditions and holding up quite well.

The dam to 902 is a moderate framed, easy fleshing daughter of Mr. Wix. She consistently does a good job, breeds back in a timely fashion year after year.

Big, stout, square hipped son of 7150. 987 is a free moving, big scrotaled bull with depth of rib and good performance from start to finish. His dam is a moderate framed, feminine female, with a good udder and sound feet and legs. After her dam she traces to 5 consecutive generations of pathfinders. 987 is a neat combination of growth, performance, and females that have worked here for many generations.

Selling 2/3 interest and full possession- Recommended for use on heifers- If you are serious about keeping your mature cow size in check this sire group of bulls by OCC Tremendous 619T will definitely fit the bill. 9166 is a moderate framed, eye appealing tank. He is big hipped, sound footed, and has an abundance of depth from fore rib to flank. After starting life at just 78 lbs. 9166 went on to wean off at 730 lbs. without creep and earn a 205 day weight of 769 lbs. to ratio 114, while securing one of the top spots at weaning as his dam's first calf. His dam is a deep ribbed, naturally thick, easy fleshing daughter of 004. She resembles her dam in many ways and is off to an excellent start. She is nursing an outstanding heifer calf by 4X13 already this year after weaning one of the top bull calves of the calf crop. Her dam Lassie 206 was considered one of the top females on the Ranch until we lost her to a broken leg after slipping on some ice. However she still produced 4 sons that sold for an average of nearly \$6500 to Ed and Lori Williams in MS, Ervin Helmuth in ND, Ron Slaubaugh in ND, and Ryg Angus in MT. One of her sons, Mc Cumber Hard Drive 7150 is the sire to a number of top bulls selling in this sale. 9166 presents an opportunity to acquire genetics that will reduce mature cow size, while not sacrificing calving ease, and early explosive growth.

Selling 2/3 interest and full possession- Recommended for use on heifers- 978 is a long bodied, free striding son of 4X13 with a bit more frame than most. He performed well across the board ratioing 100 or higher for every measurable trait. This masculine, big scrotaled bull will catch your eye sale day.

His dam is a 3rd consecutive generation pathfinder dam and has been a productive, sound uddered, female. She is another female that has never missed settling first service AI. His pathfinder grand dam was a donor here at Mc Cumber and sold through our 2003 female sale to ETR Ranch for \$6000. Although a little bigger framed, she was still easy fleshing, fertile, and productive. The whole line of females from which he descends includes many top producers.

Selling 2/3 interest and full possession- Recommended for use on heifers- This eye catcher will make some friends come sale day. 9167 is a stylish, smooth made, free moving son of Rainmaker and a maternal brother to the dam of the outstanding herd bull prospect selling as Lot 1 in this sale. 9167 performed well across the board and did very well on the ultrasound with an IMF of 4.05 to ratio 113, and a REA of 13.7 to ratio 105. His dam is a moderate framed, good uddered, super footed daughter of BT Traveler 228K and has produced three sons that sold to Arne Domben, Arlan Monson, and Gary Johnson all of ND. 9167 would have an outcross pedigree for most of our customers.

B Pride 463 of Mc Cumber is a maternal sister to Lot 33.

A thick made, heavy muscled, stout made son of 536P. 9190 is extremely long bodied and pushed the scale down for a 205 day weight of 711 lbs. to ratio 105, and earned a 365 day weight of 1225 lbs. to ratio 102 at a year. The 536P sons should sire neat uddered, easy fleshing, moderate framed daughters and this one is no exception. His dam is a good producer and descends from a line of females which include 6 consecutive generations of pathfinders.

Recommended for use on heifers- 918 is a square hipped, thick quartered, high performing, calving ease son of 4X13. He weaned off with a 205 day weight of 711 lbs. to ratio 105 as his dam's first calf. He continued his outstanding performance with an ADG of 3.56 to ratio 110 and earned a 365 day weight of 1279 lbs. to ratio 107. This big scrotated bull didn't stop there and recorded an IMF of 4.17 to ratio 117. His dam has a neat tidy udder and bred back quickly while raising 918. She is a member of the Lassie cow family and descends from a line of females who have been fertile, productive, and long lasting for many generations.

A ruggedly built, heavy boned, deep bodied, beef bull. 992 performed well across the board, with weaning, ADG, yearling, and IMF all above the average. His sire was one of the popular sons of 4X13 that sold in the 2007. Mc Cumber 4X13 Extra 7125 sold to Brad Gilbertson for \$7,750 through the 2007 sale and his dam is a maternal sister to Mc Cumber 004 Traveler 6120, and the 4X13 flush brothers out of Erianna 2206 selling through this sale. The dam of 992 is a powerful, stout made daughter of VRD and sold to Dameron Angus of IN through our 2009 female sale. Her only other son sold to Troy Gottbreht in ND. She has been an excellent producer and descends from a line of females that have been productive as well.

962 is a well made, level hiped, big rumped son of Mc Cumber 4X13 Extra 718. He moves with ease as he travels the pen, and has the style and substance that is appealing to many. His dam is a high volume, moderate framed, easy fleshing female that resembles the type of female that can withstand the harshest of conditions. Multiple generations of the females behind 962 are all of the same type and kind as his dam. Predictable, problem free, easy fleshing females back this top-notch bull.

Selling 2/3 interest and full possession- Recommended for use on heifers- 9131 is a real chunk. He is a wide based, moderate framed, thick rumped bull with excellent ultrasound data, and impeccable maternal heritage. His IMF of 4.64 to ratio 130, with a BF ratio of 97, and REA of 13.5 to ratio 104 earned him a REA/CWT of 1.21. He is a full brother to the 2008 sale topper Mc Cumber 4X13 Extra 718, who sold to Currant Creek, Lance Johnston, and Russell Becker for \$14,500. His pathfinder dam is a moderate framed, flawless uddered daughter of 004. She has been a no miss female to this point and descends from a line of females who have not only generated valuable progeny, but possess excellent udders, are moderate framed, easy fleshing, and extremely fertile. This line of cows includes 5 of 6 generations of pathfinders and dams of progeny that have been adaptable to many environments.

9131 is a unique combination of carcass and maternal. He descends from a cow line that excels for fertility, productivity, udder quality, and longevity.

917 could make your list because of his extra length, good performance, and excellent ultrasound. He earned an actual WW of 780 lbs. without creep and gained above the average with an ADG of 3.32 lbs/day. His ultrasound is exceptional with an IMF of 4.13 to ratio 116, and scanned a REA of 14.0 to ratio 108. His dam is a big middle, easy fleshing female with good feet, and her pathfinder dam was one of the top 212 daughters on the Ranch with a WWR 8/106, YWR 7/104, IMF 5/106, REA 5/110.

Recommended for use on heifers- A 4X13 that excelled at all phases. 908 is long bodied, naturally thick, deep bodied, and sound on his feet and legs. He earned a 205 day weight of 739 lbs. to ratio 109 as his dam's first calf, and recorded a 365 day weight of 1285 lbs. to ratio 107. He scanned well above average for IMF with a 3.88 to ratio 109. His dam is moderate, easy fleshing, super uddered and calved early again this year to Mc Cumber Hard Drive 7150. This quiet dispositioned, top performing bull should be safe for heifers without sacrificing performance.

Recommended for use on heifers- While only starting at 70lbs, 9210 went on to earn a 205 day weight of 744 lbs. to ratio 110 as his dam's first calf. Additionally, he is packing a huge REA of 14.5 to ratio 112 and this calculates into REA/CWT of 1.40. 9210 is an extremely well made, big topped, free moving son of OCC Tremendous 619T. He is moderate framed, deep bodied, and out of an excellent daughter of 4X13. His dam is easy fleshing, good uddered, and sound footed. She weaned one of the top bulls this fall, but bred back and calved earlier this spring. This sure shot heifer bull combines calving ease, early growth, and muscle into an appealing package. His pedigree is stacked for consistency with bulls like, 4X13, Emblazon, Alliance, New Trend, Right Time, 054, Viking, and 376. I would expect him to sire early growth, and still have the ability sire females that are moderate, easy fleshing, forage efficient, profitable beef cows.

Selling 2/3 interest and full possession- Recommended for use on heifers- 915 combines light birth, performance, and ultrasound as well as any bull in this sale. He started with only a 76 lb. birth weight and earned one of the lowest BW EPDs in this sale at -1.4. After that he recorded a 205 day weight of 740 lbs. to ratio 110 as his dam's first calf and earned a 365 day weight of 1246 lbs. to ratio 104. His ultrasound is excellent with an IMF of 3.9 to ratio 109 and a REA of 13.8 to ratio 106. His dam is a flawless uddered daughter of Mc Cumber 004 Traveler 513. She has settled AI her first two times out, and is a member of the Gale cow family. This smooth made, masculine bull is big scrotaled, level topped, and sound on his feet and legs. This calving ease specialist has the performance and carcass to be used in multiple ways. Whether used as a heifer bull or on the cows 915 should help add to your bottom line.

This replica of his sire resembles 4X13 in terms of length, base width, thickness and rib depth. He is naturally thick and performed well across the board, with weaning, gain, and yearling ratios all above average. His dam is a stout made, moderate framed, easy fleshing daughter of VRD, and out of one of the top Foundation daughters we had on this Ranch. 9133 should add pounds and performance, and sire females that are fertile, problem free, and good uddered.

Rosetta 1126, the grand dam of Lot 43.

Selling 2/3 interest and full possession- Recommended for use on heifers- This sleep all night heifer bull has a BW of just 66lbs. and a BW EPD of -2.8. Although he started life small this bull still weaned off his dam at 705 lbs. without creep, and earned a WWR of 103. 9130 has a masculine beef bull look, is small headed, and thick quartered. His dam is a highly productive daughter of Mc Cumber Total Value 449, and out of a full sister to Lassie 206. His granddam sold through our 2009 female sale to Frank Taylor and Ben Andrews of Spring Valley Ranch in NE and was an easy fleshing, perfect uddered daughter of Right Time.

Would you like to sleep all night while heifers calve? 9130 should be that kind of bull and you won't have to sacrifice pounds at weaning.

Rosetta 2158, the maternal grand dam of Lot 44.

This well made, stylish son of 536P is one of the more eye appealing sons of him you will find. He weaned off his dam at 768 lbs. and possesses depth, thickness, and cow power. His dam is a perfect uddered, easy keeping daughter of 004, and is out of the highly productive full sister to Mc Cumber Foundation 701. She produced one son that sold to Chuck Volk in last year's bull sale. We are really pleased with our 536P daughters. They have the look of a beef cow. 923 has outstanding females behind him and stacks some of the more proven cow makers in the breed with 376, Viking, Foundation, 212, 6807, Right Time, and EXT all in his pedigree.

Selling 2/3 interest and full possession- Recommended for use on heifers- 960 is another light birth, heavy weaning, good scanning son of 4X13. This linebred EXT bull is moderate framed, deep bodied, and thick. He started at only 70 lbs, but went on to wean off his dam at 740 lbs. with a 205 day weight of 744 lbs. to ratio 110 as his dam's first calf. He scanned well with an IMF of 3.98 to ratio 111, and a REA of 13.9 to ratio 107. His dam would have to be one of our favorite 536P daughters. She has a perfect udder, with small well placed teats, tight suspension, and an udder that is level from fore to rear. She maintained her flesh extremely well, bred back early, and was one of the first cows to calve this spring. Her dam is the mother of the bull selling as Lot 3 in this sale, and her grand dam is Lassie 206 who is the dam of Mc Cumber Hard Drive and one of the best females to ever roam our pastures. He descends from multiple generations of top cows and represents the type of cattle that add profit to an operation.

Selling 2/3 interest and full possession- Flush brother to the bull selling as Lot 25. 9004 is a super sound, thick made, eye catcher with extra length, a level hip, and neat head. His dam is an outstanding donor for us, and has that classic maternal look. She has a wonderful udder, with a tight attachment, and small well placed teats. She produced one son that sold to Jay and Frank Cudworth in ND. The cows behind her have been top producers, and represent our program well.

Blackcap 2213 is the dam of Lot 47.

Lassie 206 is the Great grand dam of Lot 46.

Recommended for use on heifers- This big framed son of Rainmaker 6536 has been outstanding at every measure. He earned a 205 day weight of 742 to ratio 110, gained above the average and recorded a 365 day weight of 1273 lbs. to ratio 107. In addition to this, he scanned near the top with an IMF of 3.7 to ratio 104, and a REA of 14.5 to ratio 112. This big scrotaled, smooth made bull has outstanding cows behind him. His dam is a 6th consecutive generation pathfinder dam with a history of docility, productivity, and fertility. Her full sister is Miss Wix 2027 who is also a 6th consecutive generation pathfinder. Outstanding females fill this pedigree.

Miss Wix 2027 is a full sister do Lot 48's dam.

Selling 2/3 interest and full possession- A cow maker with meat, muscle, and excellent early growth. 9220 is produced from the same fertile, productive, problem free cow family as many of the top bulls in this sale. His dam is a maternal sister to Miss Wix 2027 of Mc Cumber and has been an excellent producer here at Mc Cumber. This past fall she sold to Spring Valley Ranch in NE, as a feature of the sale. The cows in this pedigree have been excellent, and the sires in which he traces to are world renowned for the type of females which they sire.

Along with the impeccable maternal heritage of 9220, his combination of early growth and outstanding carcass potential make him a sire that will sire progeny that not only work in the pasture, but in the feedlot as well.

Selling 2/3 interest and full possession- 937 is a real chunk of meat. He has a big expressive top which he carries out into a thick, deep rear quarter. This excellent son of 6120 is loaded with meat and scanned superbly with an IMF of 4.17 to ratio 117, and a REA of 13.7 to ratio 105. Along with this he is one of the top gaining bulls on test with an ADG of 3.70 to ratio 114, and a 365 day weight of 1238 lbs. to ratio 104. His dam is equally impressive with abounding thickness, rib and capacity. She is perfect uddered, with small well placed teats, and strong fore and rear udder attachment. This big scortaled, free striding son of 6120 will impress you with his masculine beef bull look, and overall body mass and dimension.

Selling 2/3 interest and full possession- 9177 is another 4X13 that performed extremely well across the board. He earned a 205 day weight of 715 lbs. to ratio 106 as his dam's first calf. He had outstanding gain with an ADG of 3.70 to ratio 114, and recorded a 365 day weight of 1307 to ratio 109. His ultrasound is very good as well with an IMF of 3.9 to ratio 109, and a REA of 13.4 to ratio 103. 9177 is a masculine bull with a big scrotal, depth of body, and excellent thickness. His dam is a big ribbed, neat uddered daughter of Mc Cumber Tradition 383, and a member of the Miss Wix cow family. The Tradition daughters in our herd are doing an excellent job. They have superior udder quality, fleshing ease, and a mild disposition. We wish we had more of them. 9177 is one of the top 4X13 sons in this sale and will be appreciated for his performance, and appealing body type.

Selling 2/3 interest and full possession- A unique combination of style, power, and muscle. 9191 is thick, deep bodied, and excellent on his feet and legs. He puts a foot down in the corners and tracks wide and free as he moves. You will appreciate the extra substance and muscle definition in this good OCC Tremendous son. His dam is a beautiful, moderate framed, good uddered daughter of Mc Cumber Tradition 383. She is a maternal sister to the \$7250 selection of Crider Ranch in last year's bull sale, and stems from an excellent line of females. This phenotypic stand out posted a REA of 13.2 to ratio 102, and had a REA/CWT of 1.28. 9191 is another one for those interested in keeping cow size in check. I would expect him to sire progeny with ability to thrive on forage, and sire females that will work in any environment.

Selling 2/3 interest and full possession- Recommended for use on heifers- This calving ease prospect has more mass, middle, and stoutness than you would expect from a heifer bull. He has a classic beef bull look and possesses the natural thickness, base width, and body depth to work in an array of environmental conditions. His dam is a rugged built, moderate framed, easy fleshing female that stands down on a big well shaped hoof. B Pride 6107 is a full sister to Mc Cumber Total Value 551 who sold through the 2006 bull sale to Lindskov Angus Ranch in SD, and was used successfully back here at Mc Cumber. His pathfinder grand dam was a donor here at Mc Cumber and sold to Fortune's Rafter U Cross Ranch in SD through our 2006 female sale. She is a top producer with a WWR 7/106, and YWR 5/104. 9223 is one of the younger bulls in the sale, but he has the potential to be a reliable sire of calving ease, forage efficiency, and problem free females.

Selling 2/3 interest and full possession- Here is one of the top performing bulls in the sale. 9269 is an April bull but earned a 205 day weight of 754 lbs. to ratio 112, gained 3.63 lbs. per day and had a hand calculated 365 day weight of 1334 lbs. He was too young for the AAA to adjust his yearling weight. Additionally, he had an actual IMF of 3.59, and a REA of 13.4. His 2nd consecutive generation pathfinder dam is a high volume, easy fleshing female with an outstanding production record. She has a WWR 6/108, YWR 6/105, IMF 6/122, REA 6/103, and has produced sons that have sold to Bar V Ranch, and Four Ace Angus Ranch. 9269 has eye catching good looks, combined with length, muscle, and depth. He is a top performer, and backed by an outstanding female.

Selling 2/3 interest and full possession- Recommended for use on heifers- 9198 is a real changer type of bull. He started at just 78 lbs. at birth, but went on to perform very well with an ADG of 3.61 lbs/day, and earned a 365 day weight of 1266 lbs. to ratio 106. He is an extremely dense bull packing a lot of muscle and pounds on a moderate frame. He had the #1 REA of the natural born bull calves here at Mc Cumber with a REA of 15.7 to ratio 121. Even more impressive is that he had a scan weight of 1100 lbs. This calculates to a REA/CWT of 1.42 and puts him at the top of the group for this as well. 9198 is thick, heavy muscled, deep bodied and wide based. His dam is perfect uddered grand daughter of New Day, and a member of the Miss Wix cow family. 9198 is a unique bull in terms of combining calving ease, muscle mass, and performance in a moderate, forage efficient package.

Mc Cumber Foundation 701
Mc Cumber Foundation 701 and Mc Cumber Tremendous 9198 are the products of the same cow family.

Selling 2/3 interest and full possession- I've been noticing this bull all winter. He has a legitimate beef bull look with an abundance of meat, muscle, depth and soundness. 9047 is moderate framed, wide based, heavy muscled and will impress with his additional shape and expression to his rear quarter. In addition to all this the bull has performed every step of the way. This March born beef bull earned a 205 day weight ratio of 106, gained extremely well with an ADG of 3.79 lbs/day and had a 365 day weight of nearly 1300 lbs. to ratio 109. His ultrasound was very good as well with an IMF of 3.58 to ratio 111, and a REA of 14.9 to ratio 110. He has a phenomenal REA/CWT of 1.30. Make sure to check out this good scamp.

Recommended for use on heifers- A stylish calving ease prospect with shape to his top and rear quarter. 9183 is well made, free moving, and level hipped. He is another 4X13 above average for weaning, gain, yearling and IMF. His moderate framed, easy fleshing dam is sound uddered, good footed, and a member of the Blackcap cow family. She is the 6th consecutive generation of cows with WWR over 100, and traces to a Viking daughter that produced 15 calves here at Mc Cumber. This is without a doubt the best set of 4X13 sons we have produced. 9183 is very complete.

Selling 2/3 interest and full possession- Abounding with thickness, this wide based, deep bodied, big quartered beef bull is sure to make some friends sale day. In addition to this, he is long bodied, smooth fronted and free moving. His dam is a beautiful daughter of Sitz Valubull 9802. She has a near perfect udder and combines this with a moderate, easy fleshing, forage efficient body type. 9138 will not only sire those thick made, market topping steers, but will leave you a pen of replacement heifers that will make you proud.

Selling 2/3 interest and full possession- Recommended for use on heifers- 9013 has a wonderful profile, with balance, added length, attractive clean front end, and very good hoof and leg design. I realize this calving ease prospect has a 95 lb. birth weight, but the recipient dam has a lot to do with birth weight. 9013 should be fine on heifers with a BW EPD of only +.6. His donor dam is the mother of the two good Right Time sons selling in this sale, and is a sound structured, easy fleshing, neat uddered daughter of Mc Cumber 6122 Equator 8113. You'll love the females this bull will sire, and the male counterparts will have an attractive, long bodied design.

Recommended for use on heifers- 9157 is a good looking, heavy muscled, smooth made son of Mc Cumber 4X13 Extra 751. 751 was the \$12,000 2nd high selling bull in the 2008 bull sale to Nelson Angus Ranch in ID. His dam is a powerful, easy fleshing, moderate framed female with an outstanding udder and excellent feet and legs. She has settled AI every year and is currently nursing a standout 718 bull calf. 9157 should sire light birth, stylish progeny with extra length, muscle, and soundness.

This stout made, high performing son of 4x13 has a muscular, stout design. He weaned off his dam with a 205 day weight of 718 lbs. to ratio 111 and earned a 365 day weight of 1246 lbs. to ratio 105. He scanned well too, with IMF and REA ratios of 113 and 100 respectively. His dam is a good uddered, easy fleshing daughter of Mc Cumber New Trend 1206 and from the same family that produced Mc Cumber Foundation 701. This big scrotaled, naturally thick bull has the additional stoutness, and mass to work in any environment.

Selling 2/3 interest and full possession- Recommended for use on heifers- This OCC Tremendous 619T son has the capacity, natural thickness, and moderate frame to excel in a forage environment. This tank has performance ratios all over average and is one of the top gaining bulls with an ADG of 3.7 lbs/day to ratio 114, and earned a 365 day weight of 1270 lbs. to ratio 106. His dam is a big barreled, stout made, naturally thick cow. She resembles her dam in most every way. Two of her full brothers sold through the 2008 bull sale to Scott Bradac of Marmmoth ND, and a maternal brother sold to Bill Lindskov through the 2006 bull sale. If you are looking for a group of calving ease half brothers this group of Tremendous sons will add muscle, rib, early growth, and fleshing ease to a set of females.

Recommended for use on heifers- This is the second youngest bull in the sale, but has an attractive, muscular look to him. He earned a WWR over 100 and had an actual REA of 12.4 to record a REA/CWT of 1.21. His dam is a moderate framed, deep bodied, productive daughter of Sitz Alliance 6595. Don't overlook this good calving ease prospect just because is so young.

The Mc Cumber kids pose for a picture, (back, L to R) Nate and Sydney Tastad, Hannah Strong, Brett and Eva Tastad, and (front) Addison Strong.

Selling 2/3 interest and full possession- This heavy muscled, stout made 4X13 scanned the #1 REA of any bull in this sale. He had a REA of 16.3 to ratio 120 which earns him an amazing REA/CWT of 1.48. 9043 is a big topped, thick rumped bull that is not only full of meat but gained nearly 3.60 lbs/day and had a 365 day weight of 1223 lbs. to ratio 103. His dam is a high volume, good uddered, moderate framed daughter of Sitz Tradition 8702. She has done well to this point with a WWR of 2/107, and YWR of 1/103. If you are serious about adding muscle this bull should do it.

Recommended for use on heifers- 914 is a thick quartered, big topped son of Sitz Rainmaker 6536. He is wide based, free moving, and will catch your eye. He had an excellent REA of 13.8 to ratio 106, and was still average for IMF. His dam has been a consistent producer of light birth weight progeny with a BWR of 6/96, and an average BW of 6/82 lbs. In addition, she has never missed settling first service AI, and has a WWR of 6/102. She sold this fall to Rick and Leann Slaubaugh and is nursing a full brother to 914. 914 is a complete calving ease prospect backed by a strong cow, and should be a sure thing on heifers.

Watch the Sale Live - In Person, Online or On Television!

You Can Participate as an Absentee Buyer!

We prefer for each of you to be in attendance on sale day. Realistically, we know there will be some scheduling conflicts and distance limitations. In these cases, we have arranged for you to be able to participate in the sale on an absentee basis.

If possible, you can come by and evaluate the animals prior to sale day. If distance is a problem, we can also provide you with a DVD of all the cattle for home viewing. All of the lots in the sale will be available for viewing online prior to sale day at www.superiorlivestock.com as well.

Customers tell us that the video does a good job of showing conformation, structural correctness, and how the cattle travel, etc. Our sale book, with complete data on each animal, is very helpful. Please feel free to call us with questions. In addition, there will be qualified persons on hand sale day to evaluate the bulls and answer any questions you might have.

Here's How it Works!

Please call Superior Productions at 800-431-4452 and pre-register for your buyer's number. At that time they will give you the bid line number that you will use on sale day to place bids over the phone.

The sale will be broadcast via satellite on RFD-TV - Dish Network channel 231 and DirecTV channel 345. Also, Superior Productions now offers the convenience of participating on sale day by following the auction on the internet at www.superiorlivestock.com. Regardless of internet connection, you will be able to view the same video feed as seen on the satellite.

The bidding process is the same - follow the auction on the internet and call the bid line number to place your bids. Bidders who are successful in making purchases via satellite or internet will be contacted by McCumber Angus Ranch after the sale to settle payment and shipping arrangements.

Miss Wix 2027 is the maternal great grand dam of Lot 70.

Recommended for use on heifers- A light birth weight son of 4X13 that is cut from the same mold as the others. He is moderate framed, naturally thick, wide based, deep bodied, and free moving. His dam is a good uddered, moderate framed easy fleshing daughter of Right Time and descends from a line of cows with multiple generations of BWR below 100. 954 should be a sure thing on heifers not only because of his individual birth numbers, but he descends from a line of females that have been consistently light birth.

Recommended for use on heifers- This calving ease bull hit the 800 lb. mark at weaning and earned a 205 day weight of 717 lbs. to ratio 106. Additionally he had an IMF of 4.42 to ratio 142. 943 is a bit bigger framed son of 4X13. His dam is a very productive daughter of BT New Trend 172K with a BWR of 5/91, WWR 5/106, YWR 5/101, and IMF 5/110. She has never missed settling AI, and has 3 sons working for Dustin and Robyn Dunlap, Mike Halverson, and Kent Mc Dougall in ND. You'll find fertility, calving ease, and productivity, backed by generations of females with the same, in this bull.

Selling 2/3 interest and full possession- Recommended for use on heifers- This unique pedigreed, calving ease prospect by Sitz Rainmaker 6536 is sound on his feet and legs, with a quiet disposition, and heavy muscled. 9140 weaned off his outstanding 4X13 dam with a 205 day weight of 707 lbs. to ratio 105 as his dam's first calf. He has a whopper of a REA at 14.3 to ratio 110, and earned a REA/CWT of 1.34. Along with this, he is super on his feet and legs with a large well shaped hoof and a very good hind leg set. His dam is a moderate framed, neat uddered, easy fleshing daughter of 4X13 and a grand daughter of the 6th consecutive generation pathfinder Miss Wix 2027. 9140 is backed by multiple generations of top females with fertility, efficiency, and productivity.

Recommended for use on heifers- This beefy, thick topped, wide butted son of 4X13 not only performed for weaning and yearling but scanned superbly. He has an IMF of 3.85 to ratio 108, and has a whopper of a REA of 14.4 to ratio 111. His 60 lb. BW may be a bit misleading because he is a twin with a heifer, but he should be a heifer bull anyway. His dam is a light birth female with a BWR 7/97, and average BW of 9/80 lbs. His dam is a high volume, perfect uddered female with multiple generations of top cows behind her.

9152 is sired by the Canadian Agribition sale topper, Figure 8 Angus Tommy Boy. Tommy Boy is a straight Canadian bred bull, and was sampled here as an outcross sire. 9152 is sound structured, level hipped, and sound on his feet and legs. His dam is a top-notch daughter of Sitz Traveler 5556 and member of the Miss Wix cow family. 9152 offers an outcross pedigree for those of you searching for something a little different.

Recommended for use on heifers- 9159 is another light birth, heavy muscled son of Sitz Rainmaker 6536. He is a well made, thick quartered bull with a big top and plenty of rib. He recorded a REA of 13.5 to ratio 104. His dam is a moderate, easy fleshing Foundation grand daughter with excellent feet and super fertility. After missing AI as a heifer she has settled first service AI ever since. She has produced two sons that sold to Darrel Walter, and Rodney Schatz in ND, and has a nice production record with a WWR 6/105, YWR 6/101, and REA 6/105.

A well muscled, sound structured, outcross pedigreed son of Figure 8 Angus Tommy Boy. This 738 lb. weaning weight bull earned a REA of 13.5 to ratio 104. His dam is a good uddered, big middled daughter of BT Right Time 24J. She is a maternal sister to a herd bull retained here at Mc Cumber. She descends from 2 consecutive generations of pathfinder cows, and her grand dam would be considered one of the top AAR New Trend daughters ever on this Ranch. Rosetta 538 has produced one other son that sold to Clark Blake in SD, and a daughter that sold to JSK Angus in NY.

Rosetta 1017 is the maternal great grand dam of Lot 76.

Recommended for use on heifers- 9018 is a member of the flush by 4X13 and Erianna 2206 that includes Lot 8, 32 and 84. This group of calving ease flush brothers put together an outstanding set of ultrasound numbers with an average IMF of 3.81 to ratio 115, and an average REA of 13.6 to ratio 111. Along with this, their dam has been a standard for fertility, productivity, and udder quality. This group of flush brothers would make a neat group of heifer bulls to turn out together on a group of females.

Erianna 2206 of Mc Cumber is the dam of Lot 77.

Miss Wix 3027 is the dam of Lot 78.

Miss Wix 5168 is the grand dam of Lot 78.

This big, rugged, stout made bull weaned off his outstanding dam at 812 lbs. without creep and earned a 205 day weight of 727 lbs. to ratio 108. Additionally 938 is big topped, deep bodied, and scanned a REA of 14.2 to ratio 109. His pathfinder dam is a moderate framed, good uddered, easy fleshing daughter of Mc Cumber 124 Traveler 212 and has produced sons that have sold to Bar V, Mark Smith, and Rick Arnold in TX. She has been extremely fertile, settling first service AI every year and maintaining her flesh while bringing in heavy calves. The cows behind her have been equally as strong with top production ratios, and excellent fertility.

He may be down the line a ways, but this is one stout made, heavy muscled bull that should add pounds, performance, and muscle. In addition, he is out of an outstanding dam that has been fertile, productive, and problem free.

Recommended for use on heifers- 9124 is a thick, square made bull with an attractive front end and abundant rib. He puts a foot down in all four corners, and has an attractive classic Angus look to him. His dam is a gorgeous daughter of 004, and stems from one of the all-time best Mc Cumber Foundation daughters on the place. For forage efficient, moderate framed, easy fleshing cattle check out 9124.

9046 is a masculine, muscular beef bull that will surely catch your eye. This heavy muscled, long bodied son of 4X13 is packing a lot of meat. He earned a REA of 14.4 to ratio 106 and combined that with an ADG of 3.80 lbs/day and a YWR of 107. His dam is one of the nicest New Day daughters you are going to see. She is big bodied, moderate framed, sound uddered, and very attractive. If you need to add some style, and muscle to a set of calves 9046 has the potential to do just that.

McCumber 4X13 9028 is a flush brother to McCumber 4X13 9005, shown here.

Selling 2/3 interest and full possession- Recommended for use on heifers- Another member of the flush of 4X13 out of Erianna 2206. His full brothers include the bulls selling as Lot 8, 32, and 77. 9028 is the youngest bull of the group, but resembles the herd sire prospect selling as Lot 8 as much as any of the other flush mates. Following in the steps of his brothers 9028 earned an IMF of 3.81 to ratio 115, and had a REA of 13.7 to ratio 111. His REA/CWT of 1.31 is the tops for the flush. His dam is a reliable source of performance, IMF, fertility, and docility.

										1/93	1/100	1/100

Recommended for use on heifers- This Missing Link son is long bodied, deep ribbed, and free moving. He is out of a commercial daughter of 4X13, so he is not registered. However, 945 had an ADG of 3.45 lbs/day and will impress you with his overall body dimension. The Missing Link X 4X13 combination has worked beyond our expectations for siring light birth, heavy muscled, moderate framed cattle that still have the ability to perform.

Recommended for use on heifers- This good gaining, calving ease prospect is a real eye catcher. He is naturally thick, deep bodied, and correct on his feet and legs. His dam has a near perfect udder, and descends from a line of cows that includes 4 consecutive generations of pathfinders. It's not too often that you are able to select from such a large group of calving ease half brothers.

Sinclair Extra 4X13 is the sire of Lot 86.

Selling 2/3 interest and full possession- Recommended for use on heifers- This light birth, good gaining son of 4X13 is a younger bull with a lot of potential as an outstanding cow maker. He had an ADG of 3.48 lbs/day and recorded an IMF of 3.95 to ratio 111. 9221 is moderate framed, sound structured, and thick from end to end. In addition to this, his full sister is one of the best young 4X13 daughters on the Ranch. She is moderate, flawless uddered, and extremely fertile. While raising the top indexing heifer of the calf crop she bred back early and settled to her first service AI date. Her Missing Link daughter who topped the heifer calf crop at weaning sold this winter private treaty to Boyd Beef Cattle in KY. Additionally, 9221's grand dam is responsible for producing two herd sires, Mc Cumber 6122 Equator 419, and Mc Cumber 4X13 Extra 9013 who sold last spring to Clay Schaak in SD for \$7500.

When it comes to making females, this 4X13 has as much potential as any. The cows behind him have excelled for udder quality, calving ease, productivity, and longevity.

8113 is a maternal brother to Lot 88's dam.

Selling 2/3 interest and full possession- Recommended for use on heifers- This masculine, muscular beef bull is a real eye catcher. His exceptional muscle expression and thickness, combines with a neat, well proportioned design to appeal to many. His dam is a perfect uddered, easy fleshing, good footed daughter of Mc Cumber Tradition 383. In addition to this she is a maternal sister to Mc Cumber 004 Traveler 6120 and is a favorite young female of mine. The grand dam is the no miss pathfinder donor dam Erianna 2206 of Mc Cumber who sold through our 2009 female sale to Matthew Volkmar of Kemnitz Angus in SD. This sure bet on heifers will not only add muscle and early growth, but will keep mature cow size in check and sire those forage efficient, easy fleshing, problem free females that add to the profitability of a Ranch.

Mc Cumber 004 Traveler 6120 is a maternal brother to the dam of Lot 90.

Recommended for use on heifers- 9129 is the lowest BW bull of the offering. His 58 lb BW and -2.8 BW EPD should ensure his sleep all night calving ease. Even though he started so small, he still had the ability to perform with an ADG of 3.44 lbs/day and an 1178 lb 365 day weight. His dam is a moderate framed, easy fleshing daughter of 004, and had another light birth bull calf this spring at 70 lbs. The grand dam was one of the popular females from our fall female sale and sold to Current Creek Angus Ranch and Todd Klockgether.

Recommended for use on helpers- This is a beefy, thick quartered, big topped son of 536P. He is wide based, deep bodied, and excellent on his feet and legs. His good dam is off to a nice start with a BWR 2/90, WWR 2/113, and YWR 2/104. He sons have scanned well too with an average IMF of 2/112, and REA of 2/102. 9040 is a real good bull that could easily be moved up higher in the sale order.

9212 is a bigger framed son of 536P, and has a bit more length than most. His pathfinder dam has been outstanding with a BWR 6/101, WWR 6/106, and YWR 6/104. I imagine that it isn't too often that the last bull in the ring at a sale is out of a pathfinder cow.

ANGUS PARTNERS

commercial heifer sale

Sponsored by Mc Cumber Angus Ranch and Spickler Ranch

A sale for commercial heifer calves and bred heifers that are sired by or bred to Mc Cumber Angus Ranch or Spickler Ranch bulls.

Last year's sale, held in January, was successful in returning a considerable premium to the consignors of the outstanding females offered.

Contact us if you are interested in consigning to next year's sale.
