

# McCumber Angus Ranch

The Cow Herd Known for Outstanding Maternal Traits • Annual Bull Sale: March 30, 2009 at the Ranch

This has certainly been an interesting summer. From spring until early fall we were very dry. During the first part of August the rain started and hasn't let up since. I would guess that we have had over 12 inches of rain since the first part of August. This saved our pastures, which were about depleted. The corn had shut down and our fall seeded forage cover crops would not have amounted to much, but were exceptional because of the fall moisture. We are definitely set up for next year.

We have just weaned the calves and they did very well. This is the heaviest set of bull calves that we have ever weaned. They are also the most powerful in terms of depth, capacity and muscle. The high ratioing sire group was sired by 6120. 4X13 did outstand-

## Notes from McCumber

ing as well with 23 bull calves combining for a weaning weight ratio of 103. The average birth weight on these calves was 82 lbs. for a ratio of 95. We are also very pleased with the bull calves by 536P, Right Time and Timberwolf.

The heifer calves are by far the most uniform group that we have produced. The femininity that they possess with the massive amount of depth and power is amazing. This type of female can be productive in a forage environment without the supplementation of grain. They are the kind of beef animals the industry is demanding with today's high cost of production.

The Angus Partners Commercial Female sale is scheduled for January 10, 2009 at Kist Livestock Auction in Mandan. This will be the third commercial female sale that we have co-sponsored with Spickler Angus Ranch. This sale is fast becoming known as an excellent source of outstanding Angus heifer calves and bred heifers.

The McCumber influence in the North Dakota Angus Association Carcass Challenge was very dominant. We were fortunate to win the contest this year with four steers. They were some of what

was left after we had selected the bull calves that were to remain bulls. The most gratifying part was that three of the top four winners in the contest have a McCumber influence herd of cattle. Congratulations to these herds.

Our annual bull sale is March 30, 2009 here at the ranch. We will be selling around 110 yearling bulls. The sale will be broadcast on RFD-TV by Superior Livestock Productions.

**We are currently selling an outstanding group of bred heifers.** They are bred to start calving the end of January and are mostly A.I.'d to 4X13 and cleaned-up with OCC Tremendous 619T. Tremendous is an Emblazon son, who was the top selling bull in the Ohlde bull sale this past April. We are looking forward to the arrival of his calves. He exemplifies the type of bull we strive to produce, with exceptional depth of body and muscle expression. His dam is an exceptional 10 year old donor cow for Ohlde's.

We would enjoy showing you any of the cattle whenever it is convenient for you.

*- Chuck and Matt*

## McCumber Angus Ranch herd bulls that sold in 2008

The Angus Partners Commercial Heifer Sale will be held January 10, 2009 at Kist Livestock Auction in Mandan, ND. This sale is for bred heifers and heifer calves sired by or bred to McCumber Angus Ranch or Spickler Angus Ranch bulls. If you are looking for outstanding females with maternal traits bred in, you won't want to miss this sale. There will be large groups of outstanding heifer calves from some of the top commercial herds around. There will also be the top bred heifers to be found anywhere consigned, including some of the top heifer calves from last year's sale that will be brought back as bred heifers. **This is a sale of commercial females that you will not want to miss.**

4X13 is the outstanding son of EXT that is siring deep bodied, moderate framed cattle with excellent feet and legs. His first calf crop is proving him to be a calving ease specialist with above average performance and will consistently improve IMF. The first 4X13 daughters calved this spring and were excellent mothers with beautiful udders and a quiet disposition. Breed up on his daughters is excellent. A large group of sons will sell March 30, 2009. Owned with Sinclair Cattle Co. N Bar Land and Cattle Co., Lewis Hagen, and Genex Cooperative.

536P is an excellent son of EXT and out of the popular "4465" cow. 536P sires exceptional length, power and muscle in a moderate package. The first daughters of 536P are bred heifers that exhibit exceptional body mass and fleshing ability. Siring the kind of cattle that do well on a forage diet. His sons will sell March 30, 2009. Owned with Sitz Angus Ranch.

536P son to Chapman Angus, Alberta, Canada

536P Sold to Currant Creek Angus and U Cross Ranch, MT.

6120 has done an amazing job of siring calves with depth, length and abundant muscle. They have as much mass and vital organ capacity as any cattle we have produced. The dam of "6120" is a Pathfinder dam that has entered our embryo program and has been a prolific producer. You will like the first sons of "6120" that sell March 30, 2009. Owned with Kemnitz Angus Ranch, Platte, SD.

Tradition is the outstanding son of Right Time that was used back in the Mc Cumber herd. Tradition sires moderate framed bulls that possess more muscle than their sire. They are long, deep bodied cattle with perfect feet and legs. The daughters of Tradition are high volume, feminine cows with excellent udders. He is an udder improver, adding muscle and capacity. Owned with Ed and Lori Williams, Heritage Angus, MS.
